

Amazon Web Services

Introduction, What's New & Java API

Markus Dale, February 2016

Presentation Online

- ▶ <https://github.com/medale/presentations>
- ▶ Slides, notes and code sample with Maven

Amazon Web Services: AWS

- ▶ Started in 2006
 - ▶ Elastic Compute Cloud (EC2)
 - ▶ Simple Storage Service (S3)
- ▶ By 2010: Amazon.com retail web services mostly on AWS
- ▶ 2015: Over a Million Active Customers in 190 Countries
 - ▶ e.g. Netflix, Dropbox, Airbnb, Supercell

Amazon Web Services (AWS) In the News

Wired Magazine July 2015

Amazon has figured out how to make cloud pay

*\$391 million profit based on \$1.82 billion in revenue.
That's a 407 percent increase in profit from the year
before, and an 81 percent bump in revenue.*

Compute As A Service

52 AWS Services:

Compute

-  **EC2**
Virtual Servers in the Cloud
-  **EC2 Container Service**
Run and Manage Docker Containers
-  **Elastic Beanstalk**
Run and Manage Web Apps
-  **Lambda**
Run Code in Response to Events

Storage & Content Delivery

-  **S3**
Scalable Storage in the Cloud
-  **CloudFront**
Global Content Delivery Network
-  **Elastic File System** PREVIEW
Fully Managed File System for EC2
-  **Glacier**
Archive Storage in the Cloud
-  **Import/Export Snowball**
Large Scale Data Transport
-  **Storage Gateway**
Integrates On-Premises IT Environments with Cloud Storage

Database

-  **RDS**
Managed Relational Database Service
-  **DynamoDB**
Predictable and Scalable NoSQL Data Store
-  **ElastiCache**
In-Memory Cache
-  **Redshift**
Managed Petabyte-Scale Data Warehouse Service

Networking

-  **VPC**
Isolated Cloud Resources
-  **Direct Connect**
Dedicated Network Connection to AWS
-  **Route 53**
Scalable DNS and Domain Name Registration

Developer Tools

-  **CodeCommit**
Store Code in Private Git Repositories
-  **CodeDeploy**
Automate Code Deployments
-  **CodePipeline**
Release Software using Continuous Delivery

Management Tools

-  **CloudWatch**
Monitor Resources and Applications
-  **CloudFormation**
Create and Manage Resources with Templates
-  **CloudTrail**
Track User Activity and API Usage
-  **Config**
Track Resource Inventory and Changes
-  **OpsWorks**
Automate Operations with Chef
-  **Service Catalog**
Create and Use Standardized Products
-  **Trusted Advisor**
Optimize Performance and Security

Security & Identity

-  **Identity & Access Management**
Manage User Access and Encryption Keys
-  **Directory Service**
Host and Manage Active Directory
-  **Inspector** PREVIEW
Analyze Application Security
-  **WAF**
Filter Malicious Web Traffic

Analytics

-  **EMR**
Managed Hadoop Framework
-  **Data Pipeline**
Orchestration for Data-Driven Workflows
-  **Elasticsearch Service**
Run and Scale Elasticsearch Clusters
-  **Kinesis**
Work with Real-time Streaming data
-  **Machine Learning**
Build Smart Applications Quickly and Easily

Internet of Things

-  **AWS IoT** BETA
Connect Devices to the cloud

Mobile Services

-  **Mobile Hub** BETA
Build, Test, and Monitor Mobile apps
-  **Cognito**
User Identity and App Data Synchronization
-  **Device Farm**
Test Android, Fire OS, and iOS apps on real devices in the Cloud
-  **Mobile Analytics**
Collect, View and Export App Analytics
-  **SNS**
Push Notification Service

Application Services

-  **API Gateway**
Build, Deploy and Manage APIs
-  **AppStream**
Low Latency Application Streaming
-  **CloudSearch**
Managed Search Service
-  **Elastic Transcoder**
Easy-to-use Scalable Media Transcoding
-  **SES**
Email Sending Service
-  **SQS**
Message Queue Service
-  **SWF**
Workflow Service for Coordinating Application Components

Enterprise Applications

-  **WorkSpaces**
Desktops in the Cloud
-  **WorkDocs**
Secure Enterprise Storage and Sharing Service
-  **WorkMail** PREVIEW
Secure Email and Calendaring Service

EC2 Instances

- ▶ On Demand
- ▶ Reserved: up to 75% cheaper, 1-3 year contracts
- ▶ Spot Instances

Infrastructure As Code - RESTful via Management Console

EC2 Dashboard

- NETWORK & SECURITY
 - Security Groups
 - Elastic IPs
 - Placement Groups
 - Key Pairs
 - Network Interfaces
- LOAD BALANCING
 - Load Balancers
- AUTO SCALING
 - Launch Configurations
 - Auto Scaling Groups

Resources

You are using the following Amazon EC2 resources in the US East (N. Virginia) region:

0 Running Instances	0 Elastic IPs
0 Volumes	0 Snapshots
5 Key Pairs	0 Load Balancers
0 Placement Groups	4 Security Groups

Easily deploy and operate applications - use Chef recipes, manage SSH users, and more. [Try OpsWorks now.](#)

Create Instance

To start using Amazon EC2 you will want to launch a virtual server, known as an Amazon EC2 instance.

[Launch Instance](#)

Note: Your instances will launch in the US East (N. Virginia) region

Service Health

Service Status:

- US East (N. Virginia): This service is operating normally

Availability Zone Status:

- us-east-1a: Availability zone is operating normally
- us-east-1c: Availability zone is operating normally
- us-east-1d: Availability zone is operating normally
- us-east-1e: Availability zone is operating normally

Datadog Ops Monitoring

Sold by: [Datadog Inc.](#) | [See product video](#)

Datadog is a monitoring service for IT, Operations and Development teams who write and run applications at scale, and want to turn the metric and event data produced by their apps, tools and services into actionable insight. The product integrates metrics and events from many sources including existing monitoring tools, so you can visualize performance of all your services, systems and applications, without having to switch between tools. And since Datadog runs as a service in the cloud, you can focus your time on performance monitoring rather than managing monitoring servers.

Customer Rating ★★★★★ (2 Customer Reviews)

Delivery Method Software as a Service ([Learn more](#))

Support Included, [see details below](#)

Highlights

- Start monitoring all your servers and resources in minutes. The datadog agent installs quickly from the commandline and starts monitoring your systems immediately.

Pricing Details

From \$15 per month

Re:Invent 2015

- ▶ 2013: 8,000
- ▶ 2014: 13,000 attendees
- ▶ 2015: Over 20,000 attendees (TechRepublic)
- ▶ Capital One and GE as part of key note

Re:Invent 2015: Internet of Things

Re:Invent 2015: QuickSight

Re:Invent 2015: Amazon Kinesis Firehose

- ▶ Write Kinesis stream to S3 or Redshift (structured data)
- ▶ Configure buffer size, compression, encryption

Re:Invent 2015: AWS Import/Export Snowball

Re:Invent 2015: Security

- ▶ Amazon Inspector
- ▶ AWS WAF
- ▶ AWS Config Rules

Re:Invent 2015: Other Services

- ▶ Amazon Elasticsearch Service
- ▶ Amazon Kinesis Streams Extended Retention
- ▶ AWS Database Migration Service (Preview)
- ▶ Amazon RDS for MariaDB
- ▶ Amazon Cloudwatch Dashboards
- ▶ AWS Lambda
 - ▶ Python, Versioning, Scheduled Jobs, and 5 Minute Functions

AWS SDKs - Credentials for Java

- ▶ Environment Variables: `AWS_ACCESS_KEY_ID`, `AWS_SECRET_ACCESS_KEY`
- ▶ Java System Properties: `aws.accessKeyId`, `aws.secretKey`
- ▶ Default credentials: `~/.aws/credentials`
- ▶ Instance credentials (e.g. IAM role assigned to EC2 instance)

AWS Java SDK - Maven

```
<dependencies>
  <!-- Contains all APIs -->
  <dependency>
    <groupId>com.amazonaws</groupId>
    <artifactId>aws-java-sdk</artifactId>
    <version>1.10.32</version>
  </dependency>

  <!-- Or API by API:
  <dependency>
    <groupId>com.amazonaws</groupId>
    <artifactId>aws-java-sdk-s3</artifactId>
    <version>1.10.32</version>
  </dependency>
  ...
  -->
</dependencies>
```

AWS Java S3 SDK

//See S3Uploader

```
String key = args[0];
String fileName = args[1];
AmazonS3 s3Client = new AmazonS3Client(new
ProfileCredentialsProvider());
try {
    File file = new File(fileName);
    s3Client.putObject(new PutObjectRequest(
SLPR_CELL_BUCKET, key, file));
} catch (AmazonServiceException serviceEx) {
    System.out.println(serviceEx);
} catch (AmazonClientException clientEx) {
    System.out.println(clientEx);
}
```
